DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 6, 8, 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Mays.

The statement of intended use such as “for alternating a liquid fuel flow and a purge gas flow in a fuel injector” carries no patentable weight, and the fuel injector is not positive recited.

Mays discloses a method of moving a Schrader valve 20 between a closed position when needle engaging ball to open the high pressure gas (see column 2, lines 53+), the high pressure gas acting on the piston 32 of the Schrader valve 20 forcing the valve stem 47 to an upward movement thus terminating the flow of the purge gas, to open the flow of liquid fuel, advancing screw 43 to place the Schrader valve 20 in the closed position and open check valve 6/8, low pressure liquid fuel commencing flow when ball 8 moving away from valve seat

7.

Allowable Subject Matter

3. Claims 1-5 are allowed.
4. Claims 7 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

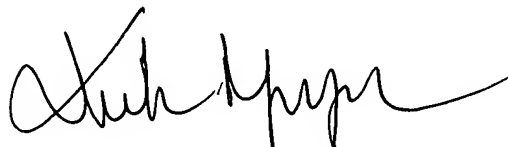

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to show the art with respect to a Schrader valve: Joshi et al., Beaver, and Knowles et al.
